FOR IMMEDIATE RELEASE

Celadon chooses MAGTEC's state-of-the-art M5K Carrier committed to securing fleet, controlling business

Monday, March 13, 2006

Calgary, AB, Canada – MAGTEC Products, Inc. announced today that it has signed a contract for implementation of its onboard M5K security device with Celadon Trucking Services, Inc.

The state-of-the-art M5K, which focuses on driver management, vehicle control, asset protection and prevention of cargo theft, was introduced today at the Truckload Carriers Association convention in Orlando, Fla.

"Celadon has made a commitment to implement MAGTEC's M5K technology to secure our fleet and control our business," said Thomas M. Glaser, president and chief operating officer of Indianapolis-based Celadon, one of the top-ten truckload carriers in North America.

"Our goal is to protect our drivers, our customer's cargo and our equipment and we believe the M5K technology helps us accomplish these goals," Glaser noted. "We have tested the M5K system over the past year and are confident in its performance."

The M5K, coupled with Celadon's over-the-air communications provider, offers many features including keyless driver authentication, remote over-the-air driver code change, tamper notification, unattended idle protection and acceleration control technology. A dispatcher can not only monitor a vehicle but also, if necessary, intervene by taking immediate control.

"Our M5K technology provides carriers with the unparalleled ability to remotely manage their trucks safely, 24/7/365, anywhere in the nation," said Robert Morisset, MAGTEC® chief executive officer. "That's a level of control which has eluded the industry until now."

About MAGTEC

For more than 10 years MAGTEC has been a leader in developing and manufacturing commercial vehicle control systems specifically designed for trucking and heavy equipment. MAGTEC's focus on preventive-based technology and fleet control addresses the increasing costs of theft and legal liability that face the transportation industry today. MAGTEC specializes in product design and enhancement, certified installation and industry education. MAGTEC works with carriers, contractors, associations and government agencies. The company is headquartered in Calgary, AB and operates a wholly owned subsidiary, MAGTEC Products (USA), Inc., in Las Vegas, NV, along with four sales offices in North America.
